

School of Engineering, Mathematics and Physics

Assessment Brief

Outline	Basic information
Module code and title:	MAST7865 Data Science Project
Module Convenor Name & Email Address:	Owen Lyne o.d.lyne@kent.ac.uk
Assessment number:	3, Project report
Assessment type and component:	Written - Report
Assessment weighting (% of overall mark for the module):	80%
Word count, length, or equivalent:	Approximately 50 pages
Module learning outcomes assessed in this assignment:	Learning outcomes 1-5. 1) Plan and execute a substantial project in data science, making use of their broad and deeper understanding of both background and more advanced material. 2) Present and describe complex analyses and draw appropriate conclusions with clarity and accuracy. 3) Apply their deep knowledge of both theoretical and practical aspects of data science to complete an extensive project in a particular area of the subject. 4) Interpret results in a sophisticated manner, showing substantial depth of understanding of how data science methods are relevant to the topic. 5) Write a coherent report describing deep and extensive work in a defined area of data science with clarity and accuracy.
Submission deadline:	12 noon Wednesday 9 th September 2026
Where to submit:	Please submit your completed assessment in the relevant Moodle submission box. Details of what needs to be submitted and file format are given in the description of the Moodle submission boxes.
How to request an extension:	Unexpected events such as illness, an accident, or bereavement sometimes happen. If so, you may need to request an extension, late submission or to be

	absent on the day of an assessed event. For instructions, see "in-course extenuating circumstance" in My Kent .
When marks and feedback on your submission will be provided on Kent Vision:	Three weeks after the deadline given in KV.
Feedback on your work:	Feedback on your work will be given on the module Moodle page. Your tutor's feedback on your assessment is one of the most valuable learning resources you have on your course. Please review it, and use it to identify skills where you can improve on future assignments. Your tutor, academic advisor, or a member of the Skills for Academic Success (SAS) team can help you apply the lessons in this feedback to future work.

1. The task

1.1. What do I need to do?

Complete the assessment, following the relevant guidelines given here: [Report guidelines](#)

1.2. Where do I start? Tips for success.

Regularly meet with your supervisor to discuss your plans for the project and progress on it.

Attend all lectures as this is critical for your academic success.

Discuss any unexpected results or errors and what they might mean, this shows critical thinking.

Start early to give yourself enough time to write and revise, rushing leads to mistakes.

1.3. May I use Generative AI?

AI Permitted

You may use AI or other software to support your work on this assessment. However, you must explain how you used it, including the prompts or inputs provided. Final answers must be your own and demonstrate independent reasoning.

See the latest guidance at the My Kent page on [Generative AI use in assessments](#).

1.4. What will I submit? Are there any special formatting or referencing styles expected?

You will submit a single PDF/Word file to the Moodle submission box. This should include any AI statement, and list of references (with in-text referencing). Tables of data and code may be included in appendices.

1.5. I have an Inclusive Learning Plan (ILP), how will this plan be accommodated?

In general, assessments have been designed to be inclusive. For timed assessments, extra time will automatically be given if your ILP recommends it. If you need more time for a coursework assessment due to the impact of your disability or mental health condition, please contact the [student engagement team](#) for your School to request an [in-course extenuating circumstance](#). If you have an ILP that you think requires further accommodation, please contact the module convenor to discuss how it would work.

2. Support available

2.1. In Class Assessment Briefing (1-3pm Monday 10th August)

Your lecturer will provide relevant information about the assessment, when the assessment is made available to you. You will also have the opportunity to ask any questions about the assessment.

2.2. Class activities or tasks that specifically help you prepare you for this assignment.

The assessment will be based on the materials covered throughout the module and materials you come across researching your topic under the guidance of your supervisor. You will be given relevant instructions when the assessment is made available.

2.3. Examples, recommended resources, or tools.

Lecture materials, including slides and notes from class discussions, will help you prepare for the assessment. Discuss appropriate examples, resources and tools with your supervisor.

2.4. Further assistance

Consultation hours: Details of lecturers' availability are on the module's Moodle page. You can get in touch with the lecturers to discuss any issues you may face regarding the assessment.

See [MyKent](#) for links to support services and resources to help you with your studies. These include the [Course Administration Team](#), [Library Search](#) and [subject librarians](#), [Skills for Academic Success](#), and [mental health and wellbeing support](#).

3. Marking criteria- How will my assignment be marked?

The assessment will be marked according to the marking criteria which can be found here:

[Mark Scheme](#)

This will be discussed in the session on August 10th.
